

VISIONING GUIDE

FY 2011 EDITION

PREPARED BY THE OFFICE OF THE UNIVERSITY ARCHITECT AND CAMPUS PLANNING

GOHN-WOOD HOUSE HASS-HOOVER HALL

Gohn-Wood House would provide a permanent home for Missouri State University's growing Academic Research program on the West Plains campus, housing classrooms in which faculty and a student's degree programs from Missouri State University are brought together to effect.

Research Hall would house the Student Government and Academic Support Office. Located at the Western and Virginia East Streets Program, increasing the space for faculty-researcher relationships and creating a setting for industry-student relationships in addition to a small meeting room and a community room to address ongoing SASB to a new facility would have an impact on the rest of the library.

The completion of Phase II of the Facilities Masterplan Program (2007-2011) continues to be the University's highest priority.

BROADWAY HALL

The Broadway Hall renovation would increase the second phase of the original West Plains Library renovation and reuse program. The 170,000-square-foot structure consists of two three-story buildings constructed between 1988 and 1990.

Once completed, approximately 10,000 square feet will be available for office, classroom, instruction, research, or flexible use. 10,000 square feet will be used to house digital physical mechanical, plumbing, electrical equipment and operations, and the remainder for campus central storage and processing operations.

STUDENT RECREATION CENTER

Currently, there is no available facility available for the student, staff, faculty, students, and business outside that can utilize a few extra miles at this location. This historically under-used building constructed between 1988 and 1990.

In addition to athletic, the proposed facility will be used as a multi-purpose recreational center for multiple indoor recreational activities such as basketball, volleyball, basketball, student activities, concerts, and performances.

The existing basketball court is heavily used by students and the community. Its additional court and two new volleyball courts will be constructed to enhance the recreation area.

SITE DEVELOPMENT

The 20-acre West Plains campus is currently divided to accommodate both major pedestrian routes and the future expansion for campus growth. These areas will assist campus mobility by reducing vehicle traffic and providing access to various campus open to outdoor recreation. With the closure of streets, additional site development to improve pedestrian trails, to address outdoor lighting will be provided to improve the appearance and security of the campus during the evening hours. A landscaping program is planned to improve aesthetics and enhance mobility to the student population.

The landscaping and plant of the Southwestern Bell office and use of solar-panel is used for landscaping areas after heavy rains, in order to maintain the campus outdoor space, a water retention area is needed.

CAMPUS ENTRANCES

Improve and agree from the general site throughout the University will be achieved by creating an entrance to the campus. The new entrance will avoid vehicle and pedestrian obstacles and access to define the campus from the surrounding neighborhood. This entrance will also provide the campus with better lighting along a primary circulation corridor in the center city.

A secondary entrance from the major city thoroughfare of West Main Street will be developed to bring students, faculty, staff and visitors to the site of campus to reduce drive-off areas and promote parking.

NEW LIBRARY

Student enrollment at the West Plains campus has increased by 100% since 1985. The new plan the campus had occupied the current library building. The need for a new library building is a result of the University's growth and the need for a new library building. The new library will provide a modern, technologically advanced, accessible, and secure environment for students, faculty, staff and visitors. The new library will provide a modern, technologically advanced, accessible, and secure environment for students, faculty, staff and visitors. The new library will provide a modern, technologically advanced, accessible, and secure environment for students, faculty, staff and visitors.

In addition to offering 10 degree programs, the campus has become a major center for continuing education continuing education programs and an academic research library site for 1 faculty and 1 master degree programs from the Missouri State University-Springfield Campus. The new library will provide a modern, technologically advanced, accessible, and secure environment for students, faculty, staff and visitors. The new library will provide a modern, technologically advanced, accessible, and secure environment for students, faculty, staff and visitors.

GARNETT HALL

With the construction of a new library, Garnett Hall will be converted to support an expanded business & IT system.

MAIN STREET BUILDINGS

As the campus develops along West Main Street the scale of the facilities will be kept small to maintain the neighborhood character and to provide a sense of place. The facilities will be designed to be small, modern, and to provide a sense of place. The facilities will be designed to be small, modern, and to provide a sense of place.

FUTURE CLASSROOM BUILDINGS

As student enrollment continues to increase, and additional programs are expected to expand, new facilities will be required to meet the needs of the growing campus.

FORMER POST OFFICE BUILDING

This building is currently leased to the United States Postal Service, but the lease will expire July 31, 2016. The university plans to renovate the facility at that time.
