

Design Guidelines  
**Division 9 Finishes**  
**Acoustic Tile Ceilings**

- Provide appropriate clearance between ceiling and equipment above to allow ceiling tile to be easily removed and replaced.
- Provide 5% of total installed square footage but not less than 1 box of attic stock. For specialty ceiling tile coordinate with MSU to determine if increased quantity of attic stock is needed.
- Specialty ceiling tiles require Owner approval
- Ceiling tile shall be removable without special tools
- Any deviations from Missouri State University's Design Guidelines should be approved with the project manager.
